

## HEALTH QUESTIONNAIRE PRODUCT HELPING PATIENTS

### MANAGED IT SERVICES

Non-Profit organization

#### CHALLENGE

In the realm of health care, continuous monitoring and assessment are crucial for effective treatment. Recognizing this need, a new project aimed to develop a Health Questionnaire product that facilitates ongoing dialogue between patients, clinicians, and volunteers. This case study outlines the approach taken by Jorim, the challenges faced, and the solutions implemented to achieve this goal.

#### SOLUTION

The Health Questionnaire product offers a digital platform for patients to complete various health assessments. The product includes features like automated scoring, detailed reports, and integration with electronic health records (EHR). Patients had easy access to assessments and resources, promoting active participation in their health care.

#### METHODOLOGY

To ensure efficient development and stakeholder engagement, Jorim opted for an Agile project management approach.. This iterative approach allowed for regular feedback and adjustments, fostering a collaborative environment between the project team and stakeholders.
